

Bio-energy fuels, heating and co-generation solutions

TallOil has quarter-century long experience in renewable Bio-energy fuels.

We have storage facilities for **TallOil Blends** substituting Heavy Fuel Oil in Sweden, Finland and in the US.

TallOil has production and storage facilities for solid Biofuels in Sweden and in Latvia.

TallOil has its own harbour, production and storage facility for fuel wood, bark, wood chips, saw dust, pellets and briquets in Stockholm, Sweden.

TallOil has its own production and storage facility in the harbour of Liepaja, located on the west coast of Latvia.

We procure biomass raw materials in Scandinavia, in the Baltic Countries of Estonia, Latvia and Lithuania as well as in Poland, Russia, Belarus, and Ukraine.

We are able to provide large scale solutions for providing long term stable supplies of biomass fuels suitable for retrofit of coal fired power stations and heating boilers.

TallOil is 100 % dedicated to Renewable Biomass Energy.
