We don't think about the environment.

We work on it instead.

Continually. For more than 40 years we have been working on development and production of natural energy and bio-energy; work that actively benefits the environment and promotes the replacement of fossil fuels with renewable fuels.

We are Scandinavia's leading bioenergy company and, through constant develop-

ment activities, we take responsibility for facilitating and rationalising the use of bio-energy. In addition to a range of services, we now offer pellets, energy peat, timber by-products, composting technology, electricity and district heating.

And things are going well for us, which is good news not only for us but also for the environment. It means, you see, that

more and more people are not simply stopping at environmental thinking, but are taking action.

Visit www.neovabioenergy.com or call +46 650 54 74 00 to find out more about us.

WORLD BIOENERGY 2008
Conference & Exhibition on Biomass for Energy
27-29 MAY 2008, JÖNKÖPING - SWEDEN

WORLD BIOENERGY ELMIA RECYCLING

Elmia Recycling
REDUCE | REUSE | RECYCLE
27-29 May, Jönköping, Sweden

Welcome to the most comprehensive World Bioenergy and Elmia Recycling event ever!

Alan Sherrard

Your contact for World Bioenergy, please call +46 36-15 22 14 or e-mail alan.sherrard@elmia.se

Climate change and population increase together pose a critical global challenge. A multifaceted challenge that is essentially about economics, if defined as the sustainable usage and distribution of scarce resources. A challenge that requires “glocal” solutions built on closed loop thinking instead of linear use and dispose. Solutions that help to decouple growth from emissions and other negative environmental impacts. It is solutions that are in focus here at Elmia.

Per Jonsson

Your contact for Elmia Recycling please call +46 36-15 21 93 e-mail per.jonsson@elmia.se

Elmia Recycling and World Bioenergy have each on their own a lot to offer you as a visitor. Both have comprehensive conference programmes with excursions to existing recycling and bioenergy facilities. Both have national and international, large and small companies exhibiting, all experts and leaders within their particular field. The most interesting opportunities are waiting to be discovered within the intersections between the two. Tap into this unique range of experience and know-how and find out how you can decouple growth from negative impacts.

Welcome!

MUS-MAX®

Terminatorservice

WOOD-TERMINATOR

POWERTEAM SWEDEN

Öka Din produktivitet genom flexibilitet i skogen...

Med Mus-Max unika huggsystem får du bara fördelar.

- Nyutvecklad huggtrumma anpassad för olika flisfraktioner!
- Nytt energisnålt framställningssätt av microflis!

Sverigepremiär!

Välkomna på Premärvisningen på

Nya T9 XLC

med en helt ny ramkonstruktion samt utrustad med T10:ans trumhuggteknik. Specialanpassad för grot! Samtliga huggar är utrustade med Can-Bus styrsystem!

AAEN Consulting Engineers A/S is working with project development, planning and design within the field of environment and energy. Our consulting enterprise has a wide foundation and includes both consultancy on established state of the art technology and on technology which is still under development. A large part of our activities are taking place abroad in cooperation with international partners. To accommodate activities in Eastern Europe and Asia a Polish subsidiary AAEN Polska Sp. z o.o. has been established in Poland operated by Polish personnel.

Produkter och automationssystem för energieffektiv framställning av biodrivmedel.

Products and automation system for energy efficient production of biofuels.

AGERATEC AB A02:51

Herrebro, 605 97 NORRKÖPING, Tel +46 11 33 52 70, Fax +46 11 17 05 55, E-mail info@agratec.com, URL: www.agratec.se, Standtel. 070-755 96 36

The company manufactures and delivers total solutions for biodiesel production with a capacity of 2 000 to 340 000 l per day. Our solutions enable production of biodiesel from a wide range of feed-stock, including vegetable oils, fish oil, used cooking oil and animal fats. We add value to your raw material. We invest a lot in quality, product development and research. The company started the production in 2003 after several years of research and development and have now 35 employees. The company has more than 70 reference plants installed in 20 countries and is looking for new markets.

Familjeföretaget med över 30 års erfarenhet av tillverkning och försäljning av marknadsledande produkter för lönsam biobränsleproduktion. En bred produktportfölj med utrustning för hela produktionskedjan, från uttag av GROT och träddeklar till färdig sönderdelad slutprodukt. I montern visas ABAB produkter för uttag av bränsle, ROGBICO buntaren, CBI kvarnar för sönderdelning och M&J grov kvarn.

Family owned business with more than 30 years experience in developing and manufacturing technology for profitable production of fuel chips. Offers a wide portfolio of products for the whole production chain, from bringing out forest residue to the production of end product. Demo in stand of ABAB thinning product, ROGBICO bundling system, CBI mills/chippers and M&J coarse mill.

Alstom Power Sweden AB A02:46

Box 1233, 351 12 VÄXJÖ, Tel +46 470 76 20 00, Fax +46 470 365 50, URL: www.alstom.se

Alstom Power är en världsledande leverantör av produkter, service och helhetslösningar för kraftgenerering. Den teknikutveckling Alstom står för skapar förutsättningar för en långsiktigt hållbar livsstil och påverkar mängas vardag. Vårt miljöfokus sträcker sig både långt bak och långt fram i tiden. Mer information om oss och vårt arbete för ren kraftproduktion hittar du på www.alstom.se

Amandus Kahl GmbH & Co A00:71

Dieselstrasse 5-9, 21465 REINBEK/HAMBURG, GERMANY, Tel +49 40 72 77 10, Fax +49 40 727 711 00, E-mail info@amanduskahl-group.de, URL: www.akahl.de

I decennier har Kahls pelleteringsanläggningar framgångsrikt använts för kompaktering av såväl organiska som oorganiska material med olika partikelstorlek, fukthalt och bulkdensitet. Företaget projekterar och levererar allt från enskilda utrustningskomponenter till nyckelfärdiga anläggningar för bland andra biobränsle- och återvinningsindustrin. Produkttester kan utföras i vår pilotanläggning. Exempel på material som framgångsrikt pelleteras med våra pressar: Såg- och hyvelspån, slipdamm, halm, biomass, pappersavfall, hushålls- och industriavfall, gummidäck, avloppsslam, plastavfall etc.

KAHL plants for the production of pellets from wood, sawdust, straw, and other organic residual products. For decades the company's pelleting plants have been applied successfully for compacting organic products of different particle sizes, moisture contents, and bulk densities. We supply turn-key plants for the recycling sector. Product tests can be carried out in our pilot plant. Possible applications of our pelleting press: Wood waste, sawdust, wood and sanding dust, straw, agricultural biomass, waste paper, municipal and industrial waste, waste tyres, sewage sludge, plastic waste etc.

Vi tillverkar pelletspressar och vi vet att driftsäkerheten på en anläggning aldrig blir bättre än dess svagaste länk. Detta tänkande genomsyrar hela vår verksamhet från konstruktion och montering till provkörning och driftsättning med utbildning hos kund. Vi ser oss som en partner till våra kunder och eftersträvar ett gott rykte och stort förtroende från våra samarbetspartners, både vad det gäller produkternas prestanda och kvalitet, men också för ett kundnära arbetssätt där vi finns med från år till år.

We manufacture pellet presses and we know that the reliability of a plant never gets better than its weakest link. This permeates all that we do from design and assembly to test drive and start up with education at place with the end customer. We see ourselves as partner

to our customers and strive for a good reputation from our customers, for both the reliability and the quality of the machines, but also for our customer-close way of working where we stand by our customer thru the years.

Företaget har tillverkat skogsbruksredskap och maskiner sedan 1922. Vi konstruerar våra maskiner så att de tar största möjliga hänsyn till mark- och miljövård, utan att ge avkall på ett tekniskt och ekonomiskt effektivt skogsbruk. Vi var till exempel först med att tillverka maskiner som skapar planteringshögar med omvänd

EXHIBITOR PRESENTATIONS

torva, en metod som ökar volymtillväxten med 20 - 100 %, beroende på marktyp. All produktutveckling sker i nära samarbete med skogsföretag, entreprenörer och svensk skogsforskning. Våra maskiner för skogsförnyring kan delas in i tre kategorier: Markberedare: högläggare och harvar. Planterings- och såddutrustning. Røjaggregat och bioenergiaggregat. På mässan visar vi røjaggregatet Bracke C12.a och bioenergiaggregatet C16.a.

The company has manufactured forestry equipment and machines since 1922. We design our machines to ensure that conservation of soil and the environment is taken into consideration to the greatest possible extent, without lowering the standards for technically and economically efficient forestry. We were, for example, the first company to manufacture machines that enable inverted turf-planting, a method that increases growth volume from 20 - 100 % depending on the type of soil. All product development takes place in close cooperation with forestry companies, contractors and Swedish forestry research. Our machines for forest regeneration can be divided into three categories: Scarifiers (mounders and disc trenchers). Planting and seeding equipment. Felling heads and accumulating felling heads. Visit us and see the felling head Bracke C12.a and the accumulating felling head Bracke C16.a.

CTU - Concepte Technik Umwelt AG is a dynamic enterprise with vast experience in the fields of thermal waste treatment and energy production from biomass. The PYCON wood gasification technology permits the use of wood gasification for medium sized power plants between 600 and 2.000 kW electric in cogeneration with 150 % thermal power. It's perfectly fitting for the supply of small villages, hotel or hospital facilities, schools, barracks etc. The KOMPOGAS dry fermentation process is the state-of-the-art-technology for the fermentation of organic waste or energy crops with a high yield of biogas, low emissions and a reliable process. Hazardous waste incineration and flue gas cleaning is our core competence since many years. At this fair we will present the new approach to produce 'Bio SNG' in cooperation with Repotec and M+W Zander.

DANBIO - Danish Biomass Association - is a non-profit organization whose purpose is to encourage the use of biomass in the energy chain and for industrial purpose on a sustainable foundation. We organize conferences, seminars and workshops with the intention to exchange the latest development, knowledge and

know how within biomass. In addition we have, in cooperation with 2 other organizations, our own Bioenergy Magazine. Our commitment to developing our global footprint, coupled with the talent and experience at the local market level, ensures our members to benefit from a focused approach to not only Bioenergy companies, science but most strongly also towards the political system. We have a close cooperation with the Scandinavian organizations as well as Aebiom in Brussels to the benefit for our members.

The company is an Energy Planner: large and small-scale systems. We are uniquely positioned as an experienced energy planner for renewable energy systems. The company has been active in the fields of Renewable Energy and Energy Efficiency since 1994, with a wide-ranging area of expertise across all sectors: Biomass Combined Heat and Power (CHP). Biofuels. Solar PV & Solar Thermal. Concentrating Solar Power (CSP). Wind. Our experience crosses a broad spectrum of activities, ranging from research to studies, energy planning, design and project realization. Given the past experience and know-how across the complete spectrum of renewable energy, the company is ideally placed to carry out advanced energy planning, for both large-scale and for small-scale systems. The activities include: Analysis/study of available energy sources. Market/research study of best-available and up-and-coming technologies for application. Detailed analysis of energy production by each energy supply technology. Simulation of energy supply and demand. Economical assessment and definition of cost effectiveness criteria. Renewable Energy strategy for integrated master plan.

Firefly AB A05:30

Box 92201, 120 09 STOCKHOLM, Tel +46 8 449 25 00, Fax +46 8 449 25 01, E-mail info@firefly.se, URL: www.firefly.se, Standtel. 076-104 32 60

Företaget är en ledande leverantör av brandskyddssystem inom processindustrin. Baserat på 30 års erfarenhet har Firefly utvecklat ett världsledande skyddssystem för preventivt skydd av materialhanteringsprocesser inom kraftvärmeverk och pelletsfabriker etc. Systemet innehåller: IR-detektorer för detektering av gnistor, glöd och varma partiklar. UV/IR flamdetektorer för skydd av öppna volymer. Släckningsutrustning av typ vattensläckning, vattendimma & ånga. I montern demonstrerar vi ett fullskaligt brandskyddssystem.

The company is a leading supplier of fire prevention systems for the process industry. Based on 30 years of experience, Firefly has developed highly ranked preventive fire protection systems for protection of material handling in power stations, pellet factories etc. Including: IR-detectors for spark-, glow- and hot body detection. UV/IR flame detection for open areas. Extinguishing equipment e.g. water spray, water mist & steam. In our booth we demonstrate a full-scale fire prevention system.

Fisker Skanderborg A/S A04:20

Vi är en ledande svensk leverantör av hetvatten-, kraft- och kraftvärmeanläggningar som eldas med biobränsle. Företaget levererar kundanpassade turn-key-lösningar och ansvarar för hela förbränningsprocessen. Anläggningarna kan drivas med många sorters träbränslen med en fukthalt på 10–60%, till exempel grot och sågverksspill, flis och även returträ. KMW Energi grundades 1958 och har under de senaste åren fokuserat på utvecklingen av kraftvärmeanläggningar (CHP)

inom effektområdet 2–15 MW el. Kunder är idag främst energiverk och industrier i Norden och KMW Energi har inlett omfattande exportsatsningar. Företaget växer kraftigt från en stark plattform i en expansiv bransch. Omfattningen 2007 uppgick till 32 miljoner euro och antalet anställda var 40. Huvudägare sedan juli 2007 är CapMan Fonder, SEB Venture Capital och Aloe Private Equity.

Environmental-technology company KMW Energi AB is a leading Swedish supplier of biofuel-fired hot-water, power and cogeneration plants (CHP). The company delivers turn-key solutions and assumes responsibility for the entire combustion process. The plants can be fired with many different wood fuels with a moisture content of 10-60%, such as felling residues, sawmill waste, chips and recycled wood. KMW Energi was founded in 1958 and in recent years focuses on the development of combined heat and power plants (CHP) in the output range of 2–15 MW of electricity. Today, customers are primarily power plants and industries in the Nordic region and KMW Energi has initiated a comprehensive export campaign. The company is growing strongly from a solid platform in an expansive industry. Sales in 2007 amounted to EUR 32 million, with 40 employees. The principal owners since July 2007 are CapMan Funds, SEB Venture Capital and Aloe Private Equity.

Komptech is a leading international supplier of technology, machines, and plants for the mechanical and biological treatment of solid waste and biomass. Our product portfolio comprises more than 25 different machine types covering the key process stages in modern waste treatment: Shredding technology. Screening and sifting technology. Separation technology. Composting technology. Modular construction offering different performance categories simplifies combinations for complete plants. Products from Komptech are currently being deployed in the following areas of expertise: treatment of solid wastes and treatment of woody biomass. Regional sales offices cover Austria, Germany, Great Britain and the United States, all other countries are serviced by independent distribution partners. This sales organization provides a highly proficient and reliable service across the globe.

LesPromInform and the Russian Forestry Review are your personal guides to the timber industry in Russia.

LesPromInform reviews the whole Russian timber industry including logging, use of forestry waste (bioenergy), sawn timber, furniture production, and wooden home construction. The special know-how of the journal is in its regular analytical overviews of forestry regions in Russia, with descriptions of the main sectors, planned investment, lists of major companies, essential contacts, and different types of equipment. The Russian Forestry Review (RFR) is a special editorial project comprising an english language collection of analytical articles. It is 240 pages, with a print run of 5000. The target audience is timber companies from around the world already active, or planning to work with the timber industry in Russia. Each new issue is a continuation of its predecessor, and examines all the amendments and new elements in legislation relating to the industry, it outlines the forestry regions of Russia and the development processes for the principal sectors, and presents readers lists of investment projects and large companies. The periodical is officially supported by Russian government structures.

Løgstør Smede & Maskinfabrik Aps og Uni-Boilers ApS har i mange år arbejdet sammen om produktion af biobrændsels kedler, både for det private og industrielle marked. På dette felt er det Løgstør baseret firma på forkant med udviklingen og har haft succes både i Danmark og på eksport markedet. Vores serie af biobrændsels kedler er produceret for flere forskellige typer brændsel. Dette gør at brændsels mulighederne er meget større. Avanceret automatisk styring og høj virkningsgrad er nogle af vores nøgle ord.

Løgstør Smede & Maskinfabrik and Uni-Boilers ApS have in years been working close together producing biofuel boilers.. The company will exhibit the newest biofuel boilers and accessories, both for the private and industrial market. In this field the Løgstør based company is at the front end of developing biofuel boilers, and have success in Denmark and on the export market. Our series of biofuel boilers are developed for different kinds of fuel, (wood chips, pellets and grain) This makes the choice of fuel very versatile. Advanced automatic controller and high efficiency are keyword for our boilers.

Scandinavia's leading bioenergy company. Neova is Scandinavia's largest bio fuel supplier. Our customers range from large thermal power stations and industries to home owners. We have a broad retail network which means that we are always located near those who use our products. CO2 free energy – our business. Neova, with a product portfolio consisting of natural and bio energy fuels, such as peat, wood fuel and pellets, heating plants and a unique composting method has a given role in Sweden's energy and environmental policy. The aim is to reduce the use of fossil fuels and to increase the use of fuels that are gentle on the environment. Our policy is to always think and act from a renewable perspective.

Tagtækkervej 5, 5230 ODENSE, DENMARK, Tel +45 66 15 70 71, Fax +45 66 15 77 71, E-mail lro@nordicbioenergy.dk, URL: www.nordicbioenergy.dk, Standtel. +45 29 25 56 73

NBE's main objective is to produce renewable energy based on biogas production. Combining the energy production with separation technology ensures that the energy is produced on an environmentally friendly basis as energy production and recirculation of both nutrients and purified water take place at the same time. This provides a basis for large-scale energy production on industrial conditions. NBE has a six point business strategy that covers a well-defined project split-up which ensures that future plants will be profitable and includes biomass concentration before entering the biogas plant.

The company produces a patented system for continuous cleaning of heating surfaces. AEROVIT is a highly developed and effective system for removal of soot and deposits from boilers, using compressed air to create computerized shock waves of immense power. Continuous cleaning results in proven higher efficiency and higher boiler output. Furthermore it cuts expenses to fuel and decreases the number of manually cleaning with 80-100%. AEROVIT can be applied to high-temperature areas and to boilers with corrosive flue gases due to the patented cooling system. AEROVIT has been on the market since 1992 and has delivered more than 1000 systems to boiler manufacturers and other satisfied customers all around the world.

Typical partners: Engineers, consultants, installers.

ScanCord AB B03:43

Box 137, 242 22 HÖRBY, Tel +46 415 154 00, Fax +46 415 154 25, E-mail info@scancord.se, URL: www.scancord.net, Standtel. 0702-88 84 44

Företaget är Skandinavien ledande leverantör av textila nät och lekplatsutrustningar. Produktsortimentet består bland annat av containernät, skyddsnät, sportnät, fågel-skydd/fågelavvisning och lekplatsutrustning. Vårt mål är att skapa säkra och funktionella miljöer för arbete och lek.

The company is Scandinavia's leading supplier of textile netting systems and playground equipment. The product range includes safety nets, sport nets, bird control products, industrial nets and playground . equipment. The overall goal for ScanCord is to create secure and functional environments for work and play.

Scandinavian International Sales A03:42

Tulstrup Have 36, 3400 HILLERØD, DENMARK, Tel +45 22 54 89 92, E-mail mr@mruge.com, URL: www.mruge.com

The company markets - among other solutions - vis/NIR measuring instruments from ASD Inc., Boulder, Colorado. Together with Aalborg University in Esbjerg, SIS is now capable of helping producers of biogas to optimise their production by measuring the free fatty acids in biomass. Our partner ASD Inc. has further, in co-operation with Xenerga, C2B2 (Colorado Center for Biorefining and Bio-fuels), and NREL (National Renewable Energy Laboratory) developed the possibility to measure almost all the parameters which you are looking for when producing bio diesel. We thus have a very strong packet to offer the bio energy industry.

Scanvaegt AB B04:48

Box 9059, 400 92 GÖTEBORG, Tel +46 31 709 07 07, Fax +46 31 709 05 07, E-mail info@scanvaegt.se, URL: www.scanvaegt.se

Scanvaegt är skandinavien ledande vågtillverkare och ingår i den världsomspännande Marel-koncernen. Vi marknadsför de flesta typer av vågar - från analysvågar till bilvågar. Våra lösningar är i många avseenden unika och innebär enkelt montage, hög driftsäkerhet och flexibilitet. Vi har också heltäckande service- och supportverksamhet där vi erbjuder konkurrenskraftiga service- och kalibreringsavtal. Vi presenterar bl.a. vår kraftfulla, användarvänliga och driftsäkra industriterminal VT8000, för datainsamling tillsammans med vår flexibla programvara ScanX, med intressanta plug-in moduler såsom ScanX e-mail och ScanX Web.

IT-företaget med över 40 års erfarenhet av enkla och säkra rutiner för inmätning, informationsförmedling och redovisning av skogs- och biobränsleråvara. I samarbete med branschen har vi effektiviserat registrering av bränsleråvara och provanalys genom vårt mätplatssystem som nu finns installerat vid drygt 60 mottagningsplatser. I våra informationssystem presenteras detaljerad information om leveransernas kvantitet och kvalitet både för redovisning och produktionsuppföljning. Denna information är behörighetsstyrd och snabbt tillgänglig över Internet för alla i affären inblandade parter.

An IT company with 40 years of experience in providing understandable procedures for data collection, accounting and support. We provide simple and reliable measuring site systems for the energy industry. Our close collaboration with heating plants and the pellet industry has allowed us to rationalize and heighten the efficiency of both raw material registration and test analyses. Clear procedures and faster feedback concerning suppliers and carriers allows you to keep track of fuel supplies. Administration is simplified and you can rest assured since all data is stored in our capable hands.

Krangan 8, 531 40 LIDKÖPING, Tel +46 510 206 90, Fax +46 510 201 07, E-mail silvaro@silvaro.se, URL: www.silvaro.se, Standtel. 0510-206 90

Vi tillverkar och säljer skogsmaskiner och skogs-maskinsutrustningar för bioenergisektorn. Vår huvudprodukt är Silvaro CS 440 Chipset, som är en beståndsgående flisskördare med frontmonterat vridbart flisningsaggregat. Vi har också vår kassett Silvaro CF 450 och vår fristående flistugg Silvaro TC 450, som säljs i olika, av kunden, specificerade kombinationer. Vi har också vårt mycket populära ackumulerande klippaggregat Silvaro K 250, som kan klippa av ett normalträdd med diameter upp till 250 mm.

Silvaro AB manufactures and sells forest machines and forest equipment for the bioenergy sector. Our main product is Silvaro CS 440 Chipset, which you can drive directly in the forest and produce chips from brands and hatches directly in the forest. Silvaro CS 440 Chipset has an frontmounted, turnable wood chip cutter. We also have our cassette "Silvaro CF 450" and our free standig wood chip cutter "Silvaro TC 450", that we sell in different configurations, with or without container, trailer, motor and so on. We also have our very popular accumulating tree cutting equipment, that can cut normal trees with a diameter up to 250 mm.

SIS, Swedish Standards Institute A06:31

Svenska Bioenergiföreningen, SVEBIO bildades 1980. Föreningens mål är att på saklig grund få till stånd en ökad användning av bioenergi på ett miljövänligt och optimalt sätt. Svebios uppgift är också att vara ledande för bioenergins utveckling och företräda samtliga aktörer i Sverige. Föreningen är ideell och öppen för alla som vill verka för detta mål.

Founded in 1980, the Swedish Bioenergy Association, SVEBIO, has around 400 member organizations and companies. The objective of SVEBIO is to work towards the increased use of bioenergy in an environmentally friendly and optimal manner. The SVEBIO mission is to be a leader for the development of bioenergy and to represent all players on the Swedish bioenergy scene. A non-profit organization SVEBIO is open to all who share the objectives of the Association.

Svensk Rökgasenergi AB A03:30

Box 8263, 163 08 SPÅNGA, Tel +46 8 580 873 00, Fax +46 8 32 29 74, E-mail info@sre.se, URL: www.sre.se

Ett ledande företag inom värmeåtervinning och rening av rökgaser. Under varumärket Renergi marknadsförs ett antal moduler som tillsammans utgör kompletta system för fjärrvärmeverk inom effektområdet 1,5–30 MW. Ett nyutvecklat torksystem är särskilt lämpat för sågverk och pelletstillverkare. Både utveckling och tillverkning sker inom den egna verksamheten i Sverige. Ingår sedan 2007 i den börsnoterade Opcon-gruppen.

A leading company in the field of heat recovery and flue gas cleaning. Under the Renergi name, the company markets a number of modules that can be combined to form complete systems for district heating plants operating within an output range of 1.5–30 MW. A newly developed drying system is particularly suitable for sawmills and pellet producers. The products are both developed and manufactured within the company's own operations in Sweden. Over 80 installations are at this point of time in operation. Svensk Rökgasenergi AB is since 2007 part of the Opcon Group which is listed on OMX Nordic Exchange.

The Trade Council of Denmark is the export and investment organisation within the Ministry of Foreign Affairs. It comprises all activities to promote Danish export and foreign investments in Denmark under one roof. This is done by means of consultancy at home and through the missions abroad offering complete, all-round consultancy on political, economic and commercial issues.

Tidningen Bioenergi A00:75

Torsgatan 12, 111 23 STOCKHOLM, Tel +46 8 518 00 170

Bioenergi är Nordens ledande tidskrift inom bioenergiområdet. Bioenergi är ett energislag som spänner över många delar av samhället. Bioenergi har av många lyfts fram som en stor möjlighet att minska klimathotet och trygga energibehovet men av några kritiska röster även beskyllts för att vara ett hot mot både växter, djur och människor. Tidningen har som ambition att bringa klarhet och lyfta fram fakta för att bidra till en hållbar bioenergiutveckling och spegla det som sker, framför allt i Sverige men även internationellt. Vi på redaktionen jobbar för att tidningen Bioenergi ska vara det självklara valet för dig som gör växande affärer inom bioenergiområdet och för alla andra som har intresse av att följa utvecklingen inom bioenergi.

Bioenergi is the leading bioenergy magazine in the Nordic region. Bioenergi is a form of energy that covers a wide spectre of the society. Bioenergi has been presented by many as a great opportunity to counter climate threat and secure the supply of energy, but by some been criticized to be a threat to both forests, animals and humans. The magazine has an ambition to bring clarity and fact to the surface, to promote a sustainable use of bioenergy and to reflect the activities in the field with focus on Sweden. We are working to maintain Bioenergi's position as the first choice for all of you who are doing business in the bioenergy field and for everybody else interested in following the emerging bioenergy market.

Vid Avdelningen för bioenergiteknik bedriver vi utbildning och forskning inom förnybar energi och miljöteknik. Vi är särskilt inriktade mot teknik som baseras på biobränslen. Vi är en del av Institutionen för teknik och design och du finner oss i D-huset på campusområdet vid Växjö Universitet.

As a part of the School of Technology and Design we carry out research and education in the area of Bioenergy Technology. We are a team of 17 people working in the department, and we are located in the D-house on campus Växjö University.

Walki Group A05:20

P.O. Box 40, 37601 VALKEAKOSKI, FINLAND, Tel +358 204 16 111, Fax +358 204 163 090, E-mail waw@walki.com, URL: www.walki.com

WALKI-Wrap Energy - Täckt grott ger mer energi. Grotvältorna som väntar på att bli biobränsle utsätts för både fukt, regn och snö i skogen. WALKI-Wrap Energy ger ett enkelt, smidigt och kostnadseffektivt skydd. Groten hålls torr och energivärdet höjs.

WALKI-Wrap Energy - Protected logging residue gives more energy. Logging residue that is intended for biofuel is exposed to moisture, rain, and snow in the forest. WALKI-Wrap Energy provides simple, manageable and cost-effective protection. The residue heap is kept and its energy value is increased - a veritable money-saving measure.

AMCS är en ledande leverantör av systemlösningar när det gäller kvalitetssäkrings- och uppföljningssystem för avfalls- och återvinningshantering hos kommuner och privata entreprenörer. AMCS har sin bas i Limerick,

Whenever bioenergy is discussed

The world of Bioenergy is dynamic and so is also our magazine. The main international edition is in its printed format distributed all over the world, last time we counted, in 62 countries. We are also proud to say that there are editions in the languages French, Italian, Polish and Russian available through partners and also a news letter in Japan.

Our motto is "to be present when ever bioenergy is discussed".

With this, one could understand several things. Most obvious is of course that our magazine is available in most of the international events, but also that we are in place to report for the readers and then maybe the most important, the professionals reading our magazine will have the knowledge with them **whenever bioenergy is discussed.**

For more information please visit our stand A04:30 and also www.bioenergyinternational.com

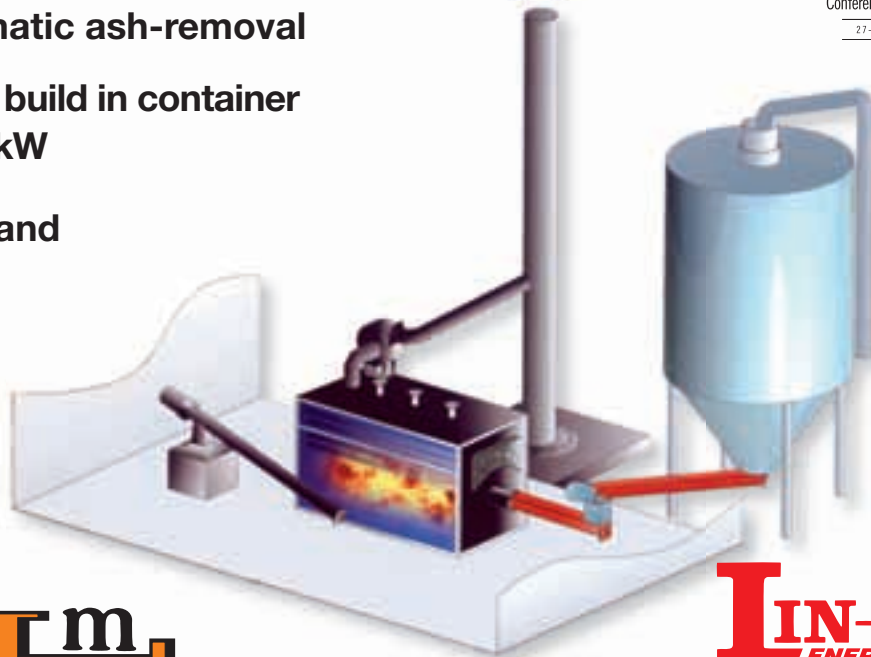

Automatic Heatingplants for combustion with:

wood pellets • briquets • straw • corn • wood chips

With automatic ash-removal

Possible to build in container
up to 3000 kW

Briquetting Solutions

Your leading supplier of briquetting solutions offers you:

- A strong alternative to pellets
- Lower investment and lower operating costs
- Complete lines
- Briquetting of wood, agri and other biomass
- Capacities – 200 to 1800 kg/hour per press

Irland. Grunderna i systemen är moduler för RFID, vägning, navigering, rutthantering och kommunikation. Sedan hösten 2007 ingår Ziglo AB i AMCS Group och ansvarar för försäljning och teknisk support i de skandinaviska länderna. AMCS är certifierat enligt ISO 9001. AMCS Group är marknadsledande inom sitt produktområde på Irland och tekniskt ledande i Storbritannien. Antal anställda är 40 och gruppen står nu inför en expansion i Skandinavien. Nyligen öppnades ett försäljningskontor i Oslo.

AMCS is a leading supplier of Waste Management System Solutions to councils and private entrepreneurs. AMCS is based in Limerick, Ireland. The systems include modules for RFID, weighing, navigation, route control and communication. Since Q4 2007 is Ziglo AB included in AMCS Group and is responsible in sales, installation and technical support of the Scandinavian market. AMCS is certified according to ISO 9001. AMCS Group is the market leader supplier in Ireland and the technical leader in UK of this sector. AMCS has 40 employees and are ready to introduce the systems at the Scandinavian market. A Sales office was recently opened in Oslo.

Ett ledande teknikkonsultföretag med kunskap som vilar på hundraårig erfarenhet. Vi erbjuder kvalificerade tjänster och lösningar för alla slags kunder och processer, inte minst inom energisektorn. Idag har vi cirka 4 000 anställda. Av dessa arbetar mer än 1 400 med energirelaterade uppdrag. Flertalet av våra energispecialister har sin bas i Sverige, Finland och i SWITZERLAND, men arbetar i uppdrag över hela världen. Tjänster inom energisektorn kan hänföras till värme- och kraftproduktion, fjärrvärme/kyla och energianvändning både för elproducenter, energikrävande industrier samt offentliga sektor. Energiprojekten täcker ett stort område, från konsultutredningar och projektering, inklusive mekanik, el och instrumentering, till projektledning. Vår erfarenhet inom bioenergiområdet sträcker sig från små värmepannor till stora CHP-anläggningar, från framställning av bio-pellets till produktion av etanol och från förstudier till utredningar på regeringsnivå. ÅF har i många år varit en viktig aktör under den intensiva utvecklingen av bioenergiesektorn, särskilt i de nordiska länderna.

The ÅF Group is a leader in technical consulting with expertise founded on more than a century of experience. We offer highly qualified services and solutions for all types of clients and processes, not least for the energy sector. Today the group has almost 4,000 employees, of whom more than 1,400 work with energy-related assignments. A majority of our energy specialists are based in Sweden, Finland and Switzerland but assignments are carried out worldwide. Services for the energy sector are related to power and heat generation, district heating/cooling and energy consumption both for utility companies, energy-intensive industries and the public

sector. Energy projects are broad in scope, ranging from consulting studies and engineering design – including mechanical, electrical and instrumentation – to project management. Our experience in the bioenergy sector extends from small, heat-only boilers to large CHP plants, from the production of bio pellets to the production of ethanol, and from feasibility studies to government investigations. For many years we have been an important player in the extensive development of the bioenergy sector, especially in the Nordic countries.

Driving the future of biofuels

Moving ahead in the fuel ethanol industry means higher yields, faster throughput and lower overall processing costs. It also means preparing for the next generation of biofuels. Novozymes offers the right combination of outstanding products, technical expertise and innovation to help you move into the fast lane. Our eco-friendly solutions help reduce ethanol production costs, optimize plant operations, decrease pollution and save precious water and energy. Join us on the road to the future. Novozymes is the world leader in bioinnovation. Together with customers across a broad array of industries we create tomorrow's industrial bio-solutions, improving our customers' business and the use of our planet's resources.
